Faustina Koduah

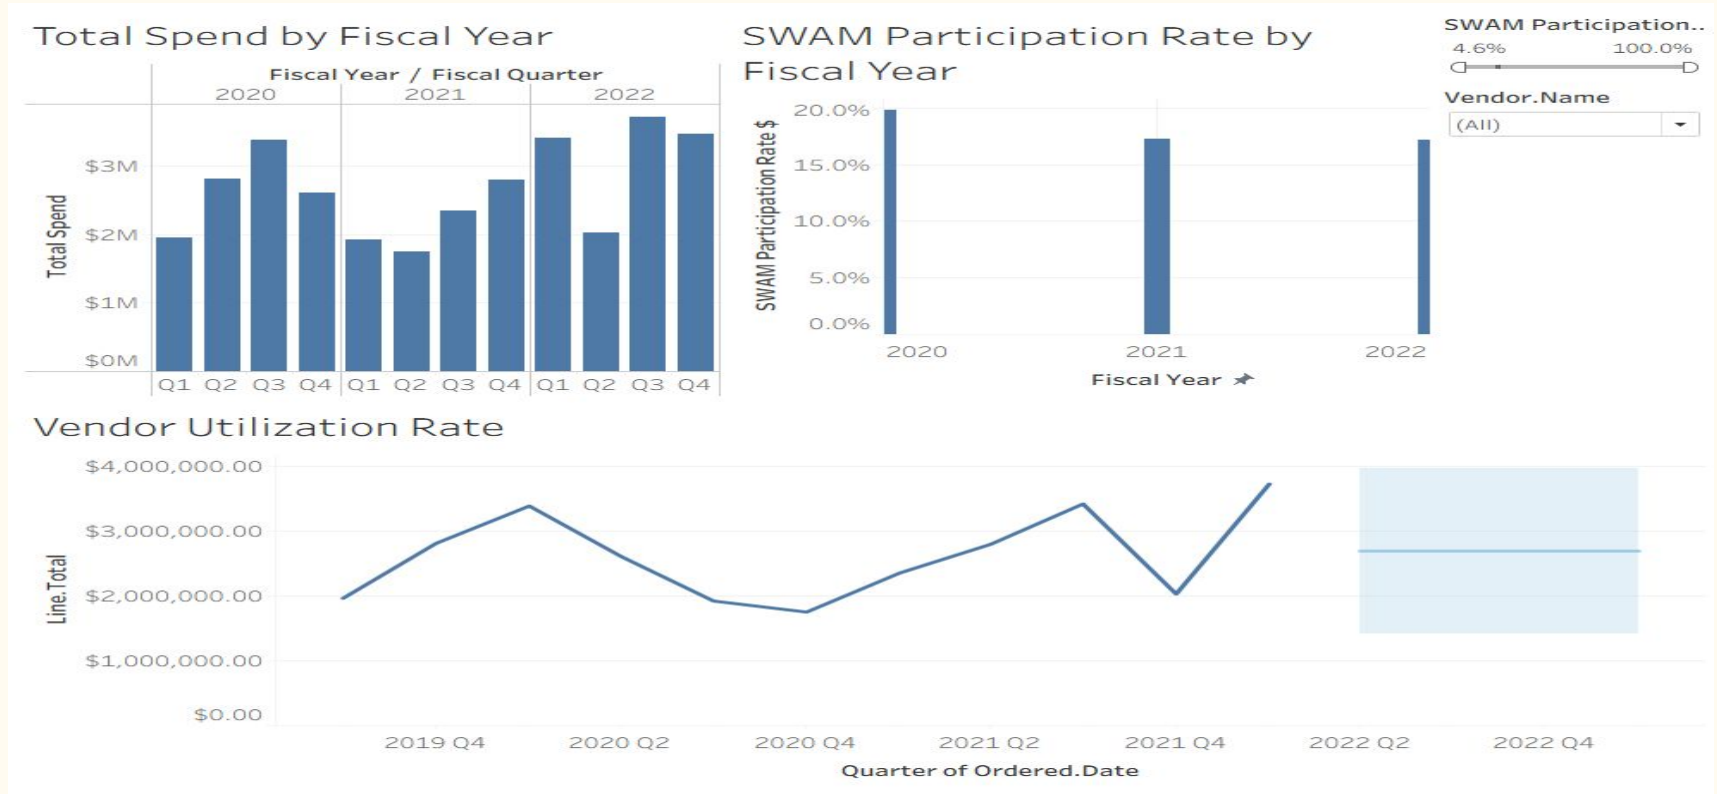

Breanna Obeng

Problem

- DPS/VADOC rely on slow, manual reporting
- Inconsistent KPI logic across teams
- Data quality issues cause rework
- Hard for leadership to get clear insights
- Current tools don't support fast decisions

LIVE DEMO

Visual of Tableau/KPI

Our Solution Using Tableau

- Centralized procurement data in Tableau
- Automated KPI logic using Tableau Prep
- Interactive dashboards for fast insights
- Standardized formulas + consistent reporting
- Supports SWaM + compliance tracking
- Easy for analysts and leadership to use

Solution overview & Why our Solution is Optimal

Key Features

- Centralized procurement data storage
- Interactive dashboards for real-time insights
- Predictive analytics for spending trends
- Automated data processing

Value

- Faster, more accurate reporting
- Better decision-making
- Reduced manual work

Why Our Solution is Optimal

- Centralizes complex procurement data into one reliable system
- Uses Tableau for strong visualization and easy user adoption
- Reduces manual work through automation
- Supports real-time insights and predictive analytics

Why This Matters

Shows value of our
working tech

Aligns with RFP
requirements

Demonstrates
technical +
non-technical
impact

Sets up our team's
solution + roles

Stakeholders

Analysts → Need accuracy + automation

Leadership → Need fast, clear insights

Operations → Need smoother workflows

All users → Need confidence in data

Traffic Light Model: Understanding Your Readiness

Red- High Resistance/ Operations Stakeholder	Yellow- Uncertain/ Data Analyst	Green- Supportive/ DPS Stakeholder
• Comfortable with manual reports • Doubt accuracy of transformed data • Concerned about security + extra workload	• See value but need training • Want clarity on calculations + BI integration	• Leadership wants better dashboards • Analysts want automation • Stakeholders want clearer compliance reporting

Impact: Identifies where resistance is strongest and helps target training & communication

P + R > E + R: Overcoming Resistance

P – Positive Vision	R- Resources Provided	E- Existing Habits	R- Resistance
• Faster reporting, automation, better insights	• Training sessions • Documentation • Transparent data validation	• Manual • spreadsheets • Old reporting processes	• Unknown of new tools • Accuracy concerns • Workload worries

Goal: Deliver a smooth transition that makes adoption easy and low- risk.

Final Value / Insights

- **Clarity supports users with different technical backgrounds** by making changes feel understandable, not overwhelming.
- **Shared clarity kept us aligned**, even with different strengths, roles, and comfort levels with data tools.
- **When people feel informed and supported**, they become more confident and ready to adopt the solution.

Leading With Clarity
